

# How we can help you achieve your dream bathroom

We help you with your bathroom layout, so you can take them to your chosen bathroom fitter/plumber.

We'll also create a beautiful design for the bathroom based on the layout agreed upon by your chosen fitter/plumber including suggestions for bathroom fittings, brassware, and floor and wall tiles.

Lastly, we'll specify the finishing touches such as mirrors, lighting and decorative accessories.

**2D VISUAL & MOOD BOARD**

**LAYOUT PLANNING**

**PRODUCT SUGGESTIONS**

**FINISHING TOUCHES**

**TILES & FLOORING**

- We recommend that you speak with a plumber or bathroom fitter before getting started on your bathroom design, this will help understand any restrictions or limitations there may be
- Due to the technical requirements of bathroom sanitary ware and hardware, your plumber/bathroom fitter will need to ensure all product choices are ordered with the correct dimensions and specifications for your bathroom
- Your chosen tiler will be able to calculate the quantity of tiles required to ensure any wastage is taken into account
